

Lightweight trailer

Plated weight: 1100Kg MAM braked

Blades, riggers and trestles can go in the trailer, to be secured by ties.

Maximum rack spaces: 9

Suitable cars: Ford Mondeo or similar and above.

Super lightweight trailer

Plated weight: 750Kg MAM unbraked

Limited space in the trailer, so riggers and trailers to go in cars.

Maximum rack spaces: 7

Suitable cars: Ford Focus or similar and above.

If you passed your car driving test on or after 1 January 1997

Combined weight of vehicle + trailer should be no more than 3500kg MAM

Check the braked towing weight of your car (check your user manual or parkers.co.uk)

Weight of towing vehicle should be no more than 3500kg MAM

Check the unbraked towing capacity of your car (check your user manual or parkers.co.uk)

If you passed your car driving test before 1 January 1997

Check the braked towing weight of your car (check your user manual or parkers.co.uk)

Check the unbraked towing capacity of your car (check your user manual or parkers.co.uk)

Reminders:

- There is more than one type of electric plug. Please check in advance that the provided plug/adaptor fits your car.
- Trailers are to be locked when unattended, keys are usually kept in the cox box cupboard.
- Remember you need your car's number plate on the back of the trailer and the plate rack pulled out. Put red and white hazard tape on the ends of your boats.
- Speed limits when towing are 60mph on motorways and dual carriage ways, 50mph on other roads unless otherwise specified.
